

## VARO Presstext English

As soon as the first beat hits the snare and the spheric sounds of the synth flood the room, you delve deep into a different world. While you still feel like you're in control you're already getting lost in the music.

VARO epitomizes the unforgettable once-in-a-lifetime spark of a first meeting. You will hold on to it for the rest of your life. Distorted, echoing guitar sounds, a pulsing bass - and this voice piercing you to the core makes you forget everything around you. You're in the middle of it without even knowing! On a journey through the music of VARO you're engulfed in the captivating and playful atmospheric warmth of this band; but underneath it is an ambience that gives you shivers – goosebumps, when you least expect them.

VARO, with it's leading lady Elisa at the helm, is a band made up of experienced lovers of Postrock, Dark Pop and genre breaking Downtempo. In Munich, VARO already established themselves in the scene with several live shows in the past year. In October 2018 the band released their first EP "here is the calm, here is the storm".

VARO embodies qualities rare among German bands. They are dynamic, versatile and continue to be surprising. They are molding their own style and their own understanding of musical variety with an eagerness to experiment and the transgression of genre boundaries. This uniqueness makes it impossible to categorize their music: the melancholy arrangements don't push you towards depression – on the contrary: they give you the strength to let go. Among the contemporary, more and more nebulous field of German rock music their style is so distinct that VARO will always be recognized.
